

Cyber Resilience

Think, Pair, Share

Ask Learners to split into groups or pairs and discuss the following:

What can you do to become more cyber resilient?

This could be done through discussion or learners could write down their ideas on a piece of flip chart paper.

Ask them to feedback to the class and explain their answers.

There are different steps that take to build cyber resilience. By completing the activities or taking part in our workshops, young people will develop strategies to help them protect themselves from cyber attacks. They will explore passwords, scans and security privacy settings.

Workshop Reminder

We will be delivering the one-off skills workshops up until March 2024 and would love to work with your young people. For more information, or to arrange a session, please get in touch via digiknow@young.scot before 5th February 2024. You can also find more information [here](#).
